22 December 2025

Dear Sir / Madam

**Planning Application 25/00855/FUL 124 Cheltenham Road Bishop's Cleeve
Cheltenham Gloucestershire GL52 8LZ**

Further to your letter of 2 December 2025, we would like to respectfully **object** to the planning application above for the following reasons:

1. The close proximity of the proposed development to our property boundary.

It is again unclear from the plans, as it was during the first and second application process, how far in feet or meters the proposed development will be relative to our boundary. There is a potential for intrusion and lack of privacy if the current trees and foliage are removed.

2. The potential to be overlooked

Elevation three suggests that the bedroom three window together with the back door of the proposed development would look directly into the garden of 32 The Nurseries thus compromising our privacy and that of the occupants too.

The first floors of numbers 31, 32 and 33 The Nurseries would also overlook the bedroom and back door.

3. Loss of Trees and hedges. Loss of natural light.

The trees and 'hedges' provide a natural barrier to the noise of traffic from the increasingly busy Cheltenham Road. The Poplar tree growing in 32 The Nurseries referenced in the plans as T7 -B1 has been intentionally left to grow for this very purpose.

Furthermore, when it is in full bloom in the Spring and Summer months, coupled with the new development there is likely to be an increased loss of light and overshadowing. Indeed, it may bring less light to all three bedrooms in the new development. There is also the potential impact of roots on the foundations of the new development given its proposed positioning.

5. Out of keeping with the surrounding area

Whilst we recognise the improvements in the design from previous applications the current proposal is still inconsistent with the majority of the surrounding area. The properties in the Nurseries including our own are primary red brick, brown or white window frames and have tiled roofs.

We agree and support the objection of the Bishop's Cleeve Parish Council on this point.

The reference and alignment to the approved development at 118 Cheltenham Road (23/0087/FUL) is only an isolated example and does not consider the wider area.

6. View and rural landscape

The house was initially purchased twenty-five years ago to incorporate view across Cleeve Hill as well as the surrounding rural area. This may be taken away unfairly.

Given the photographs shown in the application Design Statement, it seems unreasonable that such an idyllic, tranquil and well maintained peaceful rural garden setting across all the properties on the Cheltenham Road should be disturbed in this way. There are already multiple housing developments in Bishop's Cleeve which are changing the rural and ecologically friendly landscape we all once enjoyed. This is compounded by the development at number 118 Cheltenham Road.

7. Drains

According to the deeds of the house, there is a drainage system buried at the boundary at the rear of our garden. This area has intentionally not been developed to accommodate this. There is no reference made to this in the development plans and the impact it may have on all concerned.

8. Supporting development documentation

Page 11 of the Design Statement under 'siting and location' suggests that the dwelling sits neatly between the neighbouring boundaries of 126 Cheltenham Road and Number 31 The Nurseries. Our interpretation of the plans suggests that the proposed property would extend beyond Number 31 The Nurseries and include Number 32 and potentially the first floor of Number 33.

Page 10 refers to the planning application history of non-design matters. If the intention of the narrative was to suggest that there were no objections by the neighbours in general rather than specific to the vehicular access, then that appears inaccurate.

9. Noise pollution

On the assumption that the development may take some time to complete on a self-build basis and due to the proximity to our boundary with the trees and foliage removed, there is likely to be a level of construction noise and disruption during the week and at weekends. This will impact any concentrated requirements to work from home.

Thank you again for your due consideration of these objections to the planned development proposed above.

Yours faithfully,
