

Dear Sirs,

Case reference: 25/0574/RCU
'Support proposal'

I am in favour and support the proposal for swimming lessons.

I have consistently participated in lessons for my children at this residence and can confidently say that the service is a valuable asset to the community. The lessons are conducted in a peaceful and respectful manner, ensuring minimal disruption to others. Without these lessons, many children would struggle to adjust, and we risk losing a local facility that provides significant benefits to local children. The area truly gains from having this pool, offering a rare and quiet environment that many children would otherwise not have access to.
