

Planning Application – Anglian Water Response

If you would like to discuss any of the points in this document please
contact us on [REDACTED] or email
[REDACTED]

AW Site Reference: 227472/1/0230368

Local Planning Authority: Tendring District

Site: Land to The West of Sladburys Lane
Clacton On Sea Essex

Proposal: Outline Planning Application (all matters reserved) - Up to 30 dwellings plus associated infrastructure including a new access onto Sladburys Lane.

Planning application: 25/01011/OUT

Prepared by: Pre-Development Team

Date: 8 August 2025

ASSETS

Section 1 - Assets Affected

Our records show that there are no assets owned by Anglian Water or those subject to an adoption agreement within the development site boundary. However, it is highly recommended that the applicant carries out a thorough investigation of your proposed working area to establish whether any unmapped public or private sewers and lateral drains are in existence.

Due to the private sewer transfer in October 2011 many newly adopted public used water assets and their history are not indicated on our records. You also need to be aware that your development site may contain private water mains, drains or other assets not shown on our records. These are private assets and not the responsibility of Anglian Water but that of the landowner

WASTEWATER SERVICES

Section 2 - Wastewater Treatment - Condition

This site is within the catchment of Clacton-Holland Haven Water Recycling Centre (WRC), which currently lacks the capacity to accommodate the additional flows generated by the proposed development.

However, Clacton-Holland Haven WRC is included within our Business Plan as a named growth scheme with investment delivery planned between 2025-2030. To ensure there is no pollution or deterioration in the receiving watercourse due to the additional foul flows that would arise from the development, we recommend a planning condition is applied if permission is granted.

Condition: Prior to occupation written confirmation from Anglian Water must be submitted confirming there is sufficient headroom at the water recycling centre to accommodate the foul flows from the development site. This condition shall cease to have effect if the development is first occupied after April 2030.

Reason: To protect water quality, prevent pollution and secure sustainable development having regard to paragraphs 7/8 and 187 of the National Planning Policy Framework

Section 3 - Used Water Network

This response has been based on the following submitted documents: Flood Risk Assessment and Drainage Statement - 2409-955 Sladburys Lane, Holland-on- sea.

The sewerage system at present has available capacity for the anticipated foul flows. If the developer wishes to connect to our sewerage network they should serve notice under Section 106 of the Water Industry Act 1991. We will then advise them of the most suitable point of connection.

1. INFORMATIVE - Notification of intention to connect to the public sewer under S106 of the Water Industry Act Approval and consent will be required by Anglian Water, under the Water Industry Act 1991. Contact Development Services Team 0345 606 6087 Option 2. 2. INFORMATIVE - Protection of existing assets - A public sewer is shown on record plans within the land identified for the proposed development. It appears that development proposals will affect existing public sewers. It is recommended that the applicant contacts Anglian Water Development Services Team for further advice on this matter. Building over existing public sewers will not be permitted (without agreement) from Anglian Water. 3. INFORMATIVE - Building near to a public sewer - No building will be permitted within the statutory easement width of 3 metres from the pipeline without agreement from Anglian Water. Please contact Development Services Team on 0345 606 6087 Option 2. 4. INFORMATIVE: The developer should note that the site drainage details submitted have not been approved for the purposes of adoption. If the developer wishes to have the sewers included in a sewer adoption agreement with Anglian Water (under Sections 104 of the Water Industry Act 1991), they should contact our Development Services Team on 0345 606 6087 Option 2 at the earliest opportunity. Sewers intended for adoption should be designed and constructed in accordance with Sewers for Adoption guide for developers, as supplemented by Anglian Water's requirements."

Section 4 - Surface Water Disposal

The preferred method of surface water disposal would be to a sustainable drainage system (SuDS) with connection to sewer seen as the last option. Building Regulations (part H) on Drainage and Waste Disposal for England includes a surface water drainage hierarchy, with infiltration on site as the preferred disposal option, followed by discharge to watercourse and then connection to a sewer.

From the Flood Risk Assessment and Drainage Statement - 2409-955 Sladburys Lane, Holland-on- sea submitted to support the planning application the proposed method of surface water management does not relate to Anglian Water operated assets. As such, we are unable to provide comments on the suitability of the surface water management. Should the proposed method of surface water management change to include interaction with Anglian Water operated assets, we would wish to be re- consulted to ensure that an effective surface water drainage strategy is prepared and implemented.

If the developer wishes Anglian Water to be the adopting body for all or part of the proposed SuDS scheme the Design and Construction Guidance must be followed. We would recommend the applicant contact us at the earliest opportunity to discuss their SuDS design via a Pre-Design Strategic Assessment (PDSA). The Lead Local Flood Authority (LLFA) are a statutory consultee for all major development and should be consulted as early as possible to ensure the proposed drainage system meets with minimum operational standards and is beneficial for all concerned organisations and individuals.

We promote the use of SuDS as a sustainable and natural way of controlling surface water run-off.

Please find below our SuDS website link for further information.
