Stance: Customer objects to the Planning Application

Comment Reasons:

- Overlooking, privacy

Comment: I write to formally object to the above planning application relating to the erection of a single-storey, three-bedroom dwelling within the rear garden of 124 Cheltenham Road.

The grounds for my objection are set out below.

Security Concerns

The proposed access driveway would run adjacent to the full length of our property. As access to the new dwelling would be open at all times, this arrangement would significantly increase the risk of unauthorised access and reduce the overall security of neighbouring properties. The proximity and constant availability of access creates an environment that is more vulnerable to intrusion, to the detriment of existing residents.

Noise and Disturbance

The proposal allows for parking provision of up to three vehicles. The associated vehicle movements, door closures, and general activity would give rise to noise disturbance at potentially any time of day or night. This impact would be particularly harmful given that our bedrooms directly face the rear garden area, resulting in an unacceptable loss of residential amenity.

Impact on Property Value and Marketability

The introduction of a separate dwelling at the bottom of established rear gardens would undermine the value and marketability of surrounding homes. Such backland development is likely to deter potential purchasers and negatively affect the character and desirability of neighbouring properties.

Character and Overdevelopment

The surrounding area is characterised by established residential dwellings with clearly defined plot patterns, spacing, and a consistent grain of development. The subdivision of an existing garden to accommodate an additional dwelling would materially alter this established pattern.

There is concern that the proposal represents an over-intensive use of the site, eroding the spacious character of the area and introducing built form that does not reflect the prevailing layout or character of development within the locality.

For the reasons outlined above, we respectfully request that the Local Planning Authority refuses this application.
