Comments	Nothing has changed since the Applicant put in the original planning application. This is a green space, something rare on our ever growing housing market. Wildlife, insects birds and all manner of creatures use this green space. We have celebrations, community get togethers and general day to day use. Please do not take this away from us and our ever declining wildlife, the very thought of it being built is on so upsetting and so unnecessary. There is a new housing estate being built at the rear of Gibson Way so yet again more land will be taken away from our wildlife and humans to enjoy, our Countryside is fast disappearing so enough now. Comments	Ref Proposed Development Application PA25/06277 Section 3.1.3 Dear Sir / Madam I would point out that you have stated that the ground has not been used or unmaintained. This is false. I cut a path in the open space every two weeks so the older people can use it for exercising It is used as place for get togethers for the Reeves Close community. Valuable to everyone but especially to the elders. It is also used by the grandchildren of the residents when they visit on weekends and holidays which is a safe place to play. This is a green space and this application is driven by greed. The loss of green spaces in Porthleven on the whole is a disgrace. There is always a big problem with South West water dumping sewage into the sea which means that they can't cope with capacity of the village already. Where are old people going to exercise, on the streets? This
----------	--

is not acceptable. The gardens of the houses in the Close are too small to hold community events. This is why the land is important to us. [Read more](#)

Comments

I would once again like to object to the Planning Application and Appeal for Outline Permission for the Self Build development on Reeves Close, Porthleven.

The summary documents enclosed within the appeal are incorrect. The Green space is regularly maintained by Cornwall Council and is kept in good order. This space is used daily by residents of Reeves Close and the community whom do not require equipment or such, but rather a quiet open space. The suggestion that this space is unkept, unused and not maintained is a complete misrepresentation of the truth. Per all of the objections, submitted by local residents that regularly use this space, I would urge the Appeals Committee to consider their decision very carefully. Porthleven, Helston and surrounding areas are currently subject to extensive expansion on large sites that will add value to housing stocks and build larger and stronger communities. However, to remove green space within areas that are already developed, that provide an area for exercise, wellness and a vast array of wildflowers/wildlife would be a tragic loss. The decision to refuse outline planning from the outset has been considered by the council and a sound decision has been made. This decision should not be overturned or overruled as it would undermine the thorough process that has been undertaken and simply highlight that everything is possible if you have the right finances and legal team to pull apart the hard work that our council tax pays for! Comments

I don't claim to be a planning expert or know about all of the policies, but I agree with the reasoning of Cornwall Councils decisions to reject this application on multiple occasions and I see no reason why their local decision making should be overturned.

This application for one property on a piece of public open space that has a Section 106 on it, that the 'applicant' agreed to in 1998 at the time of the development of Reeves Close should remain in place for future generations.

To reiterate...

It fails paragraph 104 of NPPF
The development also conflicts with paragraph 13,
16 & 25 of cornwalls local plan
And policies C1 & G1 of cornwalls climate emergency policy

No suitable site has been identified to make up for this loss of equal or better provision and the proposed financial compensation would be far too small !

Objection to appeal

Application reference: PA25/06277

Site: Land at Reeves Close, Porthleven, TR13 9PB

I write to object to the appeal against Cornwall Council's refusal of outline planning permission for the proposed development at Reeves Close, Porthleven.

I have reviewed both the Council's decision and the appellant's Statement of Case. Having done so, I consider that the refusal represents a sound and reasonable application of national and local planning policy, and that the appeal should be dismissed.

The appeal site has functioned as open, accessible green space since the original development of Reeves Close. It has remained undeveloped for over twenty years and continues to provide informal amenity value within an established residential area. Regardless of issues relating to historic adoption or ownership, the land meets the definition of open space for planning purposes and performs a clear amenity function for nearby residents.

The appellant places considerable emphasis on the fact that the land has not been formally adopted or designated as Local Green Space. In my view, neither point is determinative. Adoption status does not define whether land is open space under planning policy, and Local Green Space designation is intended to be selective and exceptional. The absence of such a designation does not imply that land lacks value or should be regarded as expendable.

What is particularly important in this case is the local context. Porthleven is a settlement characterised by steep gradients and uneven topography. Short distances often involve significant physical effort, particularly for older residents, those with limited mobility, or people who are less confident negotiating steep or challenging routes. In this context, access to nearby green space is not a minor convenience but a meaningful part of daily amenity.

The appeal site provides exactly that type of local, easily accessible space. Its loss would therefore have a disproportionate impact compared to similar development in flatter or more accessible

settlements. While alternative green spaces may exist elsewhere in Porthleven, their distance, gradient and route characteristics mean they cannot reasonably be regarded as equivalent substitutes for this site for many residents.

The Council concluded that it had not been demonstrated that the open space is surplus to requirements, and I agree with that assessment. The appellant’s reliance on settlement-wide quantitative assessments does not adequately address the qualitative and locational importance of the site. Planning policy does not require open spaces to meet minimum size thresholds in order to be valuable, particularly where they are embedded within residential areas and serve a clearly local function.

The offer of a financial contribution towards improvements elsewhere does not, in my view, overcome this harm. While national policy allows for replacement provision in principle, it does not require decision-makers to accept financial mitigation where it does not deliver equivalent local amenity. Improvements to a more distant recreation ground do not replace the everyday, doorstep access to green space that this site provides, especially given the topographical constraints of the village.

The appellant’s reliance on appeal precedent elsewhere does not alter this conclusion. Appeal decisions are not binding and must be considered on their individual facts. The Council was entitled to reach its own judgment based on the specific role this space plays within the Reeves Close area and the particular characteristics of Porthleven.

In balancing the limited benefit of a single dwelling against the permanent loss of locally accessible open space, the Council concluded that the harm significantly and demonstrably outweighs the benefits. Having considered the evidence, I see no reason to disagree with that conclusion.

For these reasons, I respectfully request that the Inspector dismiss the appeal and uphold the Council’s refusal of planning permission.

Comments	Introduction, My name is Mr John Maundrill and i have lived in No 7 Reeves Close, since May 1999. I am directly opposite the play area, and have been here since they were built. I 100% agree with the councils decision to not allow this planning application, and reject the appeal. My reason for this, this area is constantly used by the residents of Reeves Close, for many events including dog walking and various events. The section in the statement of case is totally misleading. Appendix 6, section 6 states that the play area is not used and not maintained, this is not correct, as Cornwall Council cut and strim this play area several times per year. A local resident regularly cuts paths for dog walkers as well, the area is always
----------	--

maintained. The statement of case also shows a ariel/plan view from google maps of the distance from the play area to the Recreation ground. What it does not show is that Reeves Close is on a large hill, with most residents being of retirement age, making using the Recreation highly unlikely. This green space is very important to this site and needs to be retained, it also begs the question, if the owners are so desperate to build on this land, why did they not 27 years ago? To build here now will cause absolute choas to everyone close to the play area, not that the owners care, please refuse this appeal.

OBJECTION TO PLANNING APPLICATION PA25/06277 Appeal reference 6003242

Outline Planning Application with all matters reserved for the Proposed Erection of a Self-Build Dwelling - Land at Reeves Close, Porthleven

I wish to strongly object to this planning application, as I did to the previous application for the same site. Nothing has changed since that time - either on the ground or in terms of community feeling - and the reasons for my original objection remain valid and urgent.

1. Loss of a vital community green space and wildlife habitat
This piece of land was designated as a green space during the original development of Reeves Close, and its protection was insisted upon by the planning department at the time. There is no justification for that position to now be reversed. In fact, the need for accessible, open green space has only increased over time - both for the wellbeing of local residents and for the survival of local wildlife.

This land is absolutely not "surplus to local open space requirements" as stated in the Introduction in the planning statement with heritage impact assessment and green infrastructure statement, it is a well-used, cherished community green space. I use it daily for exercise and relaxation, walking my dog, and spending time outdoors with family and friends - especially in summer for games and picnics. It is used informally but meaningfully, and its openness is exactly what makes it so valuable. There is no other space like it locally.

The nearest alternative open space is the recreation ground, which is frequently waterlogged and unsuitable for general leisure use. Furthermore, that area is already dedicated to specific facilities such as swings and a skate park. The land at Reeves Close is unique because it is simply open - no facilities needed, just space, calm, and greenery. The mitigation that they may provide a "higher-quality open space in a more suitable location within Porthleven" is ridiculous - this is already a perfect space.

2. Ongoing local use and active maintenance of the site
The planning statement with heritage impact assessment and green infrastructure statement is full of false and misleading information.

It claims the land is "redundant and unmaintained for many years" - this is simply untrue.

Local residents actively use and care for the land. A path is mown regularly by the neighbours to ensure it remains accessible for walking and general use. I personally maintain the area by hoeing weeds from the pavement and road in front of it. The statement that the land has "not been maintained by the council" is also false - the council mow, trim and prune the trees on the land throughout the year, showing it is not abandoned or neglected.

We purposely leave some brambles to pick blackberries in autumn - this is not neglect, but a community use of the natural growth. Far from being derelict, the space is clearly valued and maintained both by residents and by the local authority.

I am personally shocked by the statement in the application commenting that due to the "unmaintained state and surplus status of the open space any harm resulting from its loss is minimal and outweighed by these benefits". I have sent photos to the council to show evidence of the use and maintenance of the field throughout the year in all seasons by the residents.

3. Destruction of an established wildlife habitat

The area has become a thriving natural space since Reeves Close was built in 1999. Wildflowers and insects are abundant, and the land is regularly visited by foxes, hedgehogs and breeding birds, which shelter in the trees and walls (I have wildlife camera footage). Bats also use this corridor as a flight route between nearby properties and the cemetery. Development would irreparably damage this habitat, and mitigation measures cannot replicate what will be lost.

4. No proven need for more housing in this location

There is no justification for building more housing in this area, especially not at the cost of losing one of the few remaining green spaces in Porthleven. A walk through the village shows how many properties are unoccupied - many serving as second homes or holiday lets. The need is not for more houses, but for more community spaces and protected natural areas.

5. Impact on residents and infrastructure

- Another dwelling would increase traffic in this small and already narrow close.
- The privacy of several existing homes would be affected by overlooking.
- The character and openness of the area would be permanently altered.
- Light levels and views would be negatively impacted.
- The loss of green space contradicts the stated aims of the Porthleven Town Plan and wider environmental goals.

6. Community opposition and willingness to act

The strength of feeling in the community against this application is high. I am willing to lead a community group to protect this land and to enhance it for community and environmental benefit.

I urge the Secretary of State to listen to local voices and our council's decision to refuse this application, as it has rightly done before. Once this land is built on, the change is irreversible. We must not lose this small but vital green space.

Yours sincerely,

Harriet Turner [Read more](#)

Comments

Dear Sir/Madam,

Appeal Reference: 6003242

Site: Land at Reeves Close, Porthleven (PA25/06277)

I write in support of Cornwall Council's decision to refuse planning permission for the above proposal and to reinforce the reasons for refusal dated 27 October 2025.

My comments below are intended to support and expand upon the Local Planning Authority's conclusions, with which I fully agree.

Loss of designated public open space

The appeal site is a long-established area of designated public open space that has been available, accessible, and actively used for informal recreation and community enjoyment since the original development of Reeves Close. It is not incidental or leftover land, but a deliberate and functional part of the estate's layout.

I agree with the Council's conclusion that the site clearly meets the definition of open space as set out in the National Planning Policy Framework (NPPF). Its continued use by local residents for walking, informal play, relaxation, and social interaction demonstrates that it provides accessible green infrastructure of genuine public value.

Crucially, it has not been demonstrated that this open space is surplus to requirements. On the contrary, it continues to serve an important role for the health and wellbeing of the local community. Nor has it been shown that the loss of this space would be replaced by equivalent or better provision in terms of quantity, quality, and accessibility in a suitable location. Any suggestion that provision elsewhere in Porthleven could compensate for this loss fails to address the site-specific value of the space to Reeves Close residents.

The proposal therefore fails to meet the tests set out in paragraph 104 of the NPPF, exactly as identified in the Council's refusal reason.

Conflict with development plan policy

I fully support the Council’s assessment that the proposal conflicts with adopted development plan policy, in particular:

- Cornwall Local Plan Strategic Policies 2010–2030 – Policies 13, 16 and 25, which seek to protect open space, promote health and wellbeing, and safeguard green infrastructure; and
- Climate Emergency Development Plan Document 2023 – Policies C1 and G1, which emphasise resilience, environmental protection, and the retention of green infrastructure as part of addressing climate and ecological challenges.

The appeal proposal would result in a net loss of green infrastructure, contrary to the clear objectives of these policies. It would weaken, rather than enhance, the environmental and social resilience of the area.

Planning balance and sustainability

I also agree with the Council’s conclusion that the harm arising from the permanent loss of this public open space would significantly and demonstrably outweigh the limited benefits associated with the delivery of a single dwelling.

Even when applying the presumption in favour of sustainable development under paragraph 11 of the NPPF, the proposal cannot be regarded as sustainable development. The loss of valued green infrastructure, harm to community wellbeing, and conflict with multiple development plan policies outweigh the modest benefit of one additional dwelling in this location.

Conclusion

The Council’s refusal is robust, well-reasoned, and firmly grounded in national and local planning policy. The appeal proposal would result in irreversible harm through the loss of a valued area of public open space and green infrastructure, with no adequate justification or mitigation.

For these reasons, I respectfully request that the Inspector upholds the Council’s decision and dismisses the appeal.

Yours faithfully,

Malcolm Turner [Read more](#)

Interested party 9

Comments	I do not support the appeal. I support Cornwall Councils decision of refusal. I resubmit my previous objection to the original planning application and also a fresh objection to support the refusal. The appeal site is an established green space which was part of the
----------	--

original development of Reeves Close and a provision of the original planning application for the development of the Close. It therefore should still stand as that provision. It is a vital part of the Close layout.

It is a well used space, accessible to all and is of genuine public value with the benefits that it provides in terms of health and wellbeing for the community. It is also an extremely quiet haven for wildlife with birds, foxes, hedgehogs, voles and bats living and using the site.

It is maintained by CORMAC with residents also mowing a path round it and managing vegetation throughout the year without upsetting the natural growth and habitat of the flora and fauna. There is no other green space in Porthleven that offers residents what this area gives all year round - accessibility, calm, green, quiet, within an accepted distance of Reeves Close. This space is not surplus land.

Porthleven has limited green space as it is, and developing this plot for the benefit of 1 dwelling does not outweigh the loss of this green infrastructure, with harm to community wellbeing, wildlife, and forever losing this precious amenity for at least 40 residents as well as the wider community.

I support Cornwall Council's refusal, they have the full knowledge of the infrastructure of Porthleven and its development, along with the policies of planning that has led to refusal of the initial application.

The appeal conflicts with the policies :-

Cornwall Local Plan Strategic Policy 2010 -2030 - 13, 16 & 25 which seek to protect open space, promote health and wellbeing, and safeguard green infrastructure.

Climate Emergency Development Plan Document 2023 – Policies C1 and G1, which emphasise resilience, environmental protection, and the retention of green infrastructure as part of addressing climate and ecological challenges.

The appeal would result in a net loss of green open space which is totally against the objectives of the policies.

There is no mitigation that can be put in place to offset this loss. Cornwall Council's refusal is based on Local and National planning policies and as such, please can the Inspectors dismiss this appeal.

Many Thanks for your attention
Annette Turner

Comments	OBJECTION - PA25/06277 Date: 7 January 2026 Nothing has changed since the planning was first agreed in 1998, it was on the condition of leaving the green space. - The reasons for the retention of this piece of land is clearly stated in the original planning obligation dated 20th February 1998. Please see the Third
----------	--

So my objection is still the same as it was on all the other application dates, the most recent being 1st September 2025

Re: PA25/06277|Outline Planning Application for the Proposed Erection of a Self-Build Dwelling - Reeves Close Porthleven TR13 9PB

My objection remains the same as it was on the original outlined planning application dated 21st December 2022 PA22/10939 which was subsequently withdrawn. The last application for outlined planning permission was on 19th April 2023 PA23/02731 and was refused. Please see the following refusal reason:

REASON: The development would result in the loss of an area of public open space and no suitable replacement open space or better provision in terms of quantity and quality in a suitably alternative location has been put forward. The development would therefore be to the detriment of the health and wellbeing on the local community and is contrary to policies 13, 16 and 25 of the Cornwall Local Plan Strategic Policies 2010-2030, policies C1 and G1 in the Climate Emergency Development Plan Document and paragraph 99 of the National Planning Policy Framework 2021.

Please also see the comment from the Principal Public Space Officer (OPEN Space) dated Tue 17 Jan 2023 which quotes about the size of the land. If this plan is approved, the open space will considerably smaller and detrimental to the enjoyment of the residents. This comment also quotes: 'The site of the proposed development was laid out around 20 years ago as an amenity/play area under planning approval W2/PA92/00570/S01 for sixteen dwellings (Vicarage Road, Porthleven). The land has been accessible to the public and used as such since this time and therefore remains designated as public open space. There does not appear to be any acknowledgement of this fact in the planning application.'

By leaving such a small piece of land as per the proposed plans does not equate to a reasonable size piece of land for an open space. The actual measurement at present being 844 square metres.

What has changed? This is the third application for outlined planning permission on this piece of land.

The reasons for the retention of this piece of land is clearly stated in the original planning obligation dated 20th February 1998. Please see the Third schedule of this document. Planning reference: W2/PA92/00570/S01

Furthermore, my objection once again is regarding the destruction of a community green amenity space which was insisted upon when Reeves Close planning was first submitted well over 20 years ago. One of the conditions of planning in the first instance was for this green space to be allocated as an amenity/play area for the use of the residents. The agreement was for this amenity area was for the

council to carry out all future maintenance. This is clearly stated in the planning obligation dated 20th February 1998. Please see the Third schedule of this document. Planning reference: W2/PA92/00570/S01. I note in one of the recent documents that it states the piece of land is not maintained or used. Firstly, how can this be ascertained if the land is not monitored 24 hours a day? The maintenance is the job of the council as per the contract in the original agreement above and not solely down to the residents to maintain it. When necessary, approximated every couple of weeks, some maintenance is carried out, i.e. grass cutting a pathway by one of the residents to allow more accessible dog walks in between council cutting to keep the land a more pleasurable area to enjoy. The brambles on the top hedge are also trimmed back for safety, but the top and bottom hedges are not regularly cut by the council, as they should be, but the residents do an excellent job of keeping the top hedge tidy and the bottom hedge is very occasionally cut by the landowner.

This plot of land as a green space was insisted on by the planning department when Reeves Close was developed and I see no reason why this has changed. I am against any development of this land and support refusal of this outline planning application.

The land is not just a redundant infill plot but a community space which is used for recreation and leisure and is home to wildlife. There is an abundance of hedgehogs in this area who can be seen regularly during the warmer seasons going to and from this area. My family use this amenity area of land daily for dog exercise and relaxation. I also take my young granddaughter on the land as a safe area for her to enjoy. In warmer weather it is used by many of the residents, some of whom are not able to walk any further to enjoy other green spaces. There have been several barbecues and gatherings of the residents on this piece of land; the next will be taking place on 27th September 2025.

The nearest open space to Reeves Close is the recreation ground at Gala Parc which is more suitable to young families who enjoy the skate park, football or the play equipment. It is not a quiet, relaxing place. The majority of residents in Reeves Close are over retiring age and the area of open space on Reeves Close needs to remain as a green space for all to enjoy. This has been enjoyed by my family personally since June 2000 when our houses were built.

The planning application states that three other planning applications have been accepted for Reeves Close. These were for minor alterations to existing properties; one being to add a conservatory, the next having a small unobtrusive extension and the last changing the use of their garage to living space, so cannot be compared to a planned development on the green space.

When we purchased the property the land was a designated green space for the use of the residents and would not be built on. This area of green space needs to remain as it is. It does not need enhancing in any way. Another property would cause extra traffic in the small close.

I would urge you once again to consider refusal of this application and leave this wonderful green space as it is.

Re: PA25/06277|Outline Planning Application for the Proposed Erection of a Self-Build Dwelling - Reeves Close Porthleven TR13 9PB

OBJECTION

I wish to object to the outlined planning permission applied for on the green space in Reeves Close, Porthleven. One of the conditions of planning approval in the first instance was for this green space to be allocated as an amenity/play area for the use of the residents. This was insisted upon when planning was agreed over 25 years ago. The agreement was for this amenity area was for the council to carry out all future maintenance, which they regularly do. The maintenance is not down to the residents, although one of the residents regularly cuts a pathway on the land to maximise use in between the council cutting. The top hedge is regularly trimmed by the residents. I note that the application states this land is not maintained or used. As above, the maintenance is the responsibility of the council, but the residents do also assist in between. I am not sure why the application states that the land is not used. It is used on a daily by us for dog exercise and regularly with our grandchild as a safe place. Also, several other residents for dog exercise, relaxation and a safe place for the children to play. We regularly hold bar be cues and gatherings on the green space. The next one is on Saturday 27th September 2025. As almost all the residents are now over retiring age, some with mobility issues and others with impaired sight, it is a vital asset to our residents who are unable to go further afield for this sort of recreation. It may also be the only social interaction they have regularly. Having been here for some considerable time, a lot of wildlife have made this piece of land their home. We regularly see hedgehogs using this area.

Our family have lived on the close since 2000 when they were new and always enjoyed using the green space. I therefore urge you to refuse planning on this piece of land so the residents can continue to enjoy this area and who understood this piece of land would remain as it is for all to enjoy.

There have been several barbecues and gatherings of the residents on this piece of land; the next will be taking place on 27th September 2025.

The nearest open space to Reeves Close is the recreation ground at

Gala Parc which is more suitable to young families who enjoy the skate park, football or the play equipment. It is not a quiet, relaxing place. The majority of residents in Reeves Close are over retiring age and the area of open space on Reeves Close needs to remain as a green space for all to enjoy. This has been enjoyed by my family personally since June 2000 when our houses were built.

The planning application states that three other planning applications have been accepted for Reeves Close. These were for minor alterations to existing properties; one being to add a conservatory, the next having a small unobtrusive extension and the last changing the use of their garage to living space, so cannot be compared to a planned development on the green space.

When we purchased the property the land was a designated green space for the use of the residents and would not be built on. This area of green space needs to remain as it is. It does not need enhancing in any way. Another property would cause extra traffic in the small close.

I would urge you once again to consider refusal of this application and leave this wonderful green space as it is.

Mrs Anne Evans

Comments	As Divisional Member for Porthleven, Breage and Germoe this application and appeal falls within my ward. Keeping my comments simple and concise. I wish to fully support the comments of the Chief Planning Officer and the Delegated Officer and their conclusion to Refuse Permission for the reason given, together with the relevant planning policies cited. Additionally, with 17 public comments, all of which object, and no supporting comments, the overwhelming conclusion is that this is an important open space for multiple reasons, highly valued and something that should be protected. Cllr. Jay Hodgetts
