

Subject: Support for Proposal

I am writing to offer my wholehearted endorsement for the continuation of swimming lessons at this facility. As a parent whose children have been swimming here, I can confidently say that this program is an essential service for our community. My partner and I adopted two children roughly seven months ago and this program has been hugely helpful in giving them the confidence to swim for the first time in a setting which is calm, organised and safe. It has been a critical part of our therapeutic approach with them.

The lessons are conducted in an organized, professional manner with minimal disruption to others. If these lessons were to be discontinued, it would adversely impact many children, especially those with specific needs that prevent them from utilizing larger public pools (including my own children for whom this service is essential). Additionally, the loss of this service would be a significant setback for our community, depriving children of a crucial local amenity. The pool offers a safe, tranquil environment that many children would otherwise not be able to access, making it an indispensable community resource.
