

Dear Sir/Madam,

Case Reference: 25/0574/RCU

Subject: Support for Swimming Lessons

I'm writing to give my full support to this proposal. As a parent whose child has had lessons here, I can see how important this is for local children, many of whom can't manage in larger, noisy environments. The sessions are run by highly qualified teachers who are respectful of others, and provide a much-needed option —particularly to those with additional needs. Losing this resource would leave these children without learning how to be safe in the water which is a fundamental life skill.
