

To Whom It May Concern Case Reference: 25/0574/RCU

I'm writing to voice my strong support for the swimming programme at 30 Allandale Avenue. As a Level 2 qualified swimming instructor, I've seen firsthand how vital this pool is for local families, especially those with children who have additional or sensory needs.

This space provides a calm, inclusive environment where children who struggle in mainstream settings can learn crucial water safety skills. Swimming is not only essential for health and fitness but also plays a key role in preventing drowning—a leading cause of accidental death.

Beyond physical benefits, the pool fosters community and provides employment for local instructors like myself. If this facility closes or loses support, families will lose a lifeline, and qualified teachers may be forced to seek work elsewhere outside Barnet.

I urge you to support this vital service.
