

I'm writing to express my full support for the pool at 30 Allandale Ave. As a certified swim instructor, I've seen firsthand the positive impact this facility has on local families—especially those with children who have additional needs that need a smaller, quiet setting.

This pool offers a calm, inclusive environment where kids who may struggle in traditional swim programs can learn essential water safety skills in a supportive setting. These skills are not just recreational—they are life-saving.

Beyond that, the pool fosters a strong sense of community and provides employment for local instructors. If it were to close or lose funding, many families would be left without crucial support, and skilled staff could be forced to seek opportunities elsewhere.

Please ensure this valuable resource continues to serve the local Barnet community.
